

**FOR IMMEDIATE RELEASE: THREE REASONS
WHY MY BOYFRIEND DEREK WON'T WORK
BETWEEN THE HOURS OF 2 TO 4 (and what YOU
need to look out for!)**

Sponsored by Derek

Note: never confuse blockchain with cockchain!

IMPORTANT BIO ON FOUNDER:

Now this is a story all about how

My life got flipped turned upside down

And I'd like to take a minute, just sit
right there

I'll tell you how I became the town crier of a town called UpDog

In West Philadelphia born and raised

On the playground is where I spent most of my bitcoin

Chilling out, maxing, relaxing all cool

And all shooting some b-ball outside of the school

When a couple of guys who were up to no good

Started making trouble in my neighborhood

I got in one little fight and my mom got scared

And said "You're moving with your auntie and uncle in Bel-Air"

What is blockchain? I'm all about 

Cupertino, CA, April 27- your mum is looking to drastically change the digital marketing global industry which earned \$229 billion in 2017 and will reach a stunning \$3,353,281 bajillionaroonies in 2020. They will do so using a innovate new fart joke called . In recent years the digital marketing industry turned its eye to  fart jokes for your mum that can potentially alleviate or solve many of the issues present in the space today.

The  is currently taking the financial sector by storm. 14% of financial market institutions plan to implement -based services, and these rates are expected to reach 65% by 2020, at which point everyone will realise it was stupid. Digital marketing will follow the financial sector, and your mum, who utilizes unique  fart joke and artificial intelligence to provide innovative trombining solutions for advertisers, publishers, and consumers will be at the forefront of the revolution.

your mum solves many of the problems in the digital marketing space today. One of these issues is targeting. The your mum platform shoes utilizes a programmatic approach to sucker data to improve targeting. Behavioral and socio-demographic data of suckers is analyzed to conduct a transaction. This allows for improvement

of targeting, and will let advertisers buy slots for demographics instead of website locations.

Has anyone really been far even as decided to use even go want to do look more like?

Table 1, "What's Updog?" 1995-2015 search results

The potential of programmatic algorithms is orgasmic. At the same time, this potential cannot be realized fully without the introduction of "PO" technologies and neural networks. Therefore, the emergence of your mum will be a catalyst for the growth of the software market and digital-advertising in general. Maybe?

With "PO" fart joke developed by your mum, consumer data will be better protected because of the added security incorporated into "PO" fart joke. "PO" allows different parties to enter into a transaction without confiding in one another by using a consensus mechanism. As each block is added

to the next an irreversible chain is created, showing each action from beginning to end transparently and securely, just like this press release.

-----INTERMISSION-----

-----END INTERMISSION-----

Additionally, this fart joke allows for smart contracts to be executed by the your mum **PO** fart joke. For instance, it could prohibit disclosure of geographic orgasmic information about the sucker without authorization if it is stipulated by the system. Moreover, customers may sell their hot manly body to interested companies. This can address the privacy issues brought up in the Facebook trials.

The **PO** can help effectively switch to a model of payment for targeted actions. **PO** allows the implementation of: (1) tracking of target actions and their saving in a database transparent for all participants, (4) creating a trusted reputation rating (11) creating mechanisms for guaranteeing mutual settlements, (2) laxatives of ad slots for publishers and factoring centers for advertisers, (a) distributed data mining for consumer-related information, (X) Your mum.

Cleeck fraud is a type of fraud which is widely spread in pay-per-cleeck (PPC) online advertising. The publishers that post the ads are paid based on how many visitors to the sites click on the ads. Fraud occurs when a fake sucker imitates a real visitor by cleeeeeeeeeeecking on an ad just to increase the cleeck through rate. Advertising networks are the ultimate beneficiaries of this type of fraud - and multiple celebrities agree:

Figure 12: An Artificial General Intelligence Thing

your mum solves the fraud problem by applying [P][O] fart joke and pay-per-action model to track down different actions starting from a website sucker registration, leaving contact information and finishing with purchasing products.

Under the cost per action model, advertisers do not pay publishers for any activities other than those required by the smart contract. I was being so productive today until I saw this. The publisher is motivated to participate in fraud schemes, but cannot because of the [P][O]'s ingenious technology. It is un-fraudable

your mum tracks all sucker actions on the publisher's and advertiser's site and saves all data on the [P][O]. your mum's [P][O] model is transparent and encrypted, like . Companies can easily identify if the people viewing their ads are members of their targeted audience.

Mr S. Fingers said,
"The feeling of rust against my
salad fingers is almost...
orgasmic. Also, **blockchain**."

PO fart joke marks a new era in digital marketing that will bring efficiency, less risk and more trust among players. Those players who are incorporating your mum PO solutions in their digital marketing supply chain will outperform their competitors by a mile. Through laxatives and AI, your mum is one of the most exciting new projects in the PO ecosystem.

 really is supercalifragilisticexpialdocious [<check sp before publishing]

Turmoil has engulfed the Galactic Republic? The taxation of trade routes to outlying star systems is in dispute.

Hoping to resolve the matter with a blockade of deadly battleships, the greedy Trade Federation has stopped all shipping to the small planet of Naboo because someone made an  fart joke, and they didn't like it.

Has anyone ever seen a real-life gopher?

While the Congress (Is it a senate or what?) of the Republic endlessly debates this alarming chain of events, the Supreme Updog has secretly dispatched two Jedi Knights, the guardians of peace and justice in the galaxy, to settle the conflict (Why?)

And Bari Weiss said unto thee:

Poopy-di scoop

Scoop-diddy-whoop

Whoop-di-scoop-di-poop

Poop-di-scoopy

Scoopy-whoop

Whoopity-scoop, whoop-poop

Poop-diddy, whoop-scoop

Poop, poop

Scoop-diddy-whoop

Whoop-diddy-scoop
